offset or overlapping with a critical business process—firewall rules may be disabled or new signatures withheld. Because the calendar integrates with Panorama and the SaaS-based Cortex platform, a single error propagates to every managed device, amplifying impact. Scheduling a nightly rule update at 02:00 PM in a local time zone while the device operates on UTC can postpone updates by 10 hours, leaving the network exposed during peak traffic.

Solution: Always set calendar entries in UTC or explicitly verify the device's time zone setting before saving. Admins often create multiple windows for patching, backups, and policy pushes without checking for overlap, causing the firewall to enter a "safe mode" that disables intrusion prevention.

Solution: Use Palo Alto's conflict detector view to flag overlapping entries and consolidate tasks into a single, well-defined window.
